

ROWNAB DAS GUPTA

DATA ENGINEER | PYSPARK | APACHE SPARK | PYTHON | SQL | AWS

rownab.dg21@gmail.com | [+91-8944056609](tel:+91-8944056609) | [linkedin.com/in/rownabdg](https://www.linkedin.com/in/rownabdg) | github.com/RownabDasGupta | rownabdasgupta.github.io/Portfolio_Website

PROFESSIONAL SUMMARY

Data Engineer with **5+ years** of experience designing, developing, and optimizing scalable **ETL/ELT** pipelines using **Python, PySpark, Apache Spark, SQL, and AWS**. Experienced in production data engineering with **Amazon S3, AWS Glue, Athena, Redshift**, specializing in **Spark performance optimization**, data quality, validation, **orchestration, CI/CD**, cloud data engineering, data migration, and large-scale batch processing.

TECHNICAL SKILLS

Programming: Python, SQL, Scala

Data Engineering: PySpark, Apache Spark, Spark SQL, ETL/ELT, Data Migration, Data Quality, Data Validation, Performance Optimization

AWS: S3, AWS Glue, Glue Data Catalog, Athena, Redshift, Lambda, Step Functions, CloudWatch, IAM, CloudFormation

Orchestration & DevOps: Git, GitHub, GitLab, GitHub Actions, CI/CD

Databases: MySQL, RDBMS, DBMS

Tools & Platforms: Databricks, Cloudera, IOMETE, VS Code, Jupyter Notebook, PyCharm, IntelliJ IDEA

PROFESSIONAL EXPERIENCE

Deloitte | Data Engineer

Hyderabad, India

Project: Customer Experience Data & Insights Engine

Jul 2025 – Present

- Designed and developed production AWS ETL pipelines using **PySpark, Python, SQL, AWS Glue, Apache Spark, S3, Glue Data Catalog, Athena, and Redshift** for large-scale data processing.
- Built scalable **PySpark, Spark SQL** transformation workflows and performed data profiling, schema validation, data quality checks, and source-to-target reconciliation using **SageMaker JupyterLab** and AWS Glue Interactive Sessions.
- Optimized Spark workloads by analyzing execution time, write performance, worker/DPU utilization, and resource usage; **reduced job runtime by ~35%, processed ~2 TB per run, and lowered AWS compute costs by ~25%**.
- Automated **AWS Glue infrastructure deployment and ETL orchestration** using **Python, Troposphere, CloudFormation and Lambda**, with GitHub Actions-based CI/CD, automated testing, pull requests, and peer reviews.
- Leveraged **GitHub Copilot with Claude** and **Microsoft Copilot** for AI-assisted development, debugging, code optimization, documentation, and productivity across data-engineering workflows.

HCLTech | Data Engineer

Hyderabad, India

Project: Digital Continuity of Supply

Jan 2022 – Oct 2024

- Developed and optimized scalable production **ETL pipelines** using **PySpark, Python, SQL, AWS Glue** for batch data processing and transformation.
- Built and orchestrated **15+ automated batch workflows** across **AWS S3, Glue, Lambda, Step Functions, Athena, Redshift, IAM, and CloudWatch**, handling **~500 GB of data per run**.
- Improved pipeline performance by **~30%** through Spark optimization, debugging, data validation, and workflow tuning, while improving reliability and operational efficiency.
- Translated **JIRA requirements** into data-engineering solutions and managed development through **GitLab, code reviews, CI/CD, and controlled deployments**, leveraging AI-assisted tools for Spark development and troubleshooting.

Amazon | Process Associate

Bangalore, India

Project: SAS to Scala Data Migration

Nov 2020 – Jan 2022

- Developed ETL workflows for **SAS-to-Scala data migration, transformation, and validation** using **Scala, SQL, Python, AWS, and GitHub**.
- Performed **large-scale data processing and source-to-target validation** to ensure data accuracy, consistency, and successful migration across datasets.

CERTIFICATIONS & COURSES

- [AWS Certified Cloud Practitioner](#) – 2026
- [Claude Code](#) – 2026
- [Prompt Engineering](#) – Full Course for AI – 2026
- [Apache Spark 3](#) – Full Course for Data Engineers – 2026
- [AI for all](#) – Full Course – 2026

PROJECTS

Cricket Data Analysis - ETL Project | [GitHub Link](#)

Sept – Oct 2026

- Built an end-to-end ETL pipeline using Apache Spark and PySpark to transform data from Amazon S3; applied SQL-based transformations and Python analysis to identify key trends.

Play Store Data Analysis - ETL Project | [GitHub Link](#)

Aug – Sept 2026

- Engineered a PySpark ETL pipeline to ingest and process multiple datasets into Databricks DBFS and analyzed application ratings, installs, and category trends using PySpark and SQL.

EDUCATION

Asansol Engineering College (AEC) | B.Tech – Electrical Engineering | West Bengal, India | Graduated 2020

Paikar High School | 12th | West Bengal, India | 2015

Paikar High School | 10th | West Bengal, India | 2013
